

The Outaouais Health Professionals Retention Project

Improving access to health and social services by encouraging the retention of bilingual health and social services professionals.

The Outaouais -

one of the most dynamic regions in Quebec today, with a growing population and many vibrant workplace settings and opportunities.

- A great place to start a career and raise a family with affordable housing, low-cost daycare and excellent schools.
- Experience exciting outdoor activities like bungee-jumping, hiking, skiing, aerial parks, canoeing, rock-climbing and skating on the Rideau Canal.

Opportunities abound...

- Choose from the region's 6 hospitals, 18 CLSCs as well as long-term care and rehabilitation institutions in either a fast-paced urban setting or a community-based facility in a rural area.
- Graduates from outside the region, including Ottawa, can be eligible for a \$3000 installation bonus.
- For available positions refer to the recruitment page of the Centre intégré de santé et services sociaux de l'Outaouais (CISSSO): santeoutaouais.qc.ca/en/home.

We are...

- conducting outreach and awareness of health and social services careers in schools,
- promoting the McGill Bursary Program for bilingual health and social services students,
- developing areas of collaboration with youth integration and employment organizations, and
- promoting the benefits of working in the Outaouais region.

We'll work with you to...

- encourage and assist eligible students to apply to the McGill Bursary Program,
- support your employment search,
- facilitate your integration in the Outaouais, and
- link you to other resources.
